Introduction	9
A presentation of principles rather than statistics or models on how to turn around a dying church, and how a healthy church can cope with changes that affect its growth and ministry.	
1. Reshaping the Life Cycle	19
Protestant churches experience a life cycle similar to that of businesses, and should be aware that maturity brings problems that may need fixing to avoid a downward spiral and a declining ministry.	
2. The Symptoms of Decline	31
A study of 30 turnaround churches revealed that a number of symptoms usually contribute to a church's decline. This chapter offers a list of eight areas to check in diagnosing a congregation's state of health.	
3. From Dream to Reality	41
Interviews identified 11 factors that were present when a dying church was restored to wholeness, ranging from replacing the pastor to reliance on the Holy Spirit, and widespread and heartfelt prayer.	

- 4. Attributes of Turnaround Leaders** 61
While pastors of turnaround churches share many attributes common to pastors of healthy churches, they generally are strong leaders in their 30s or 40s who also are workaholics, strategic thinkers and risk-takers.
- 5. Strategies for Growth** 73
The renewal process involved a number of steps, including a plan, modeling spiritual maturity, not dwelling on the past, doing a limited number of things well, returning to the basics and introducing success.
- 6. Potholes on the Road to Recovery** 87
A church must deal with at least a dozen obstacles relating to attitudes, resources and relationships to accomplish a turnaround. Its primary emphasis, however, must be on spiritual renewal of the body.
- 7. Avoiding the Downward Spiral** 99
The healthy church can learn from the experiences of declining congregations. Twenty suggestions based on this study and on church growth principles are offered to help prevent a decline, and to renew a congregation.
- 8. The Last Hurrah** 111
While the chances are slim that a declining church can be turned around, the churches that have been successful usually are user friendly and strive to achieve balance in spirituality, methodology and heart.
- Appendix** 117
Listed are attendance figures, and the names of ministers and the 30 turnaround churches included in this study.
